## TAMPER PROOF ROLLER SHUTTER DOOR

### Robust - Compact - High Security

---

High Strength Roller Shutter doors are designed for high security situations that accommodates the basic security need. The Titan Tamper Proof door is custom made to suit your specific requirements using high torque direct drive motor to bare the weight too great to lift manually, this design allows the door to roll up in a very compact bundle leaving a clear space and unobstructed view.

This seamless designed product operates effortlessly to ensure that everyone who comes in contact with this door can feel a sense of confidence that their property is safe and secure.

## STANDARD SPECIFICATION

### Opening Sizes

4000mm Wide x  
4000mm High

### Operation

The Roller Shutter is either operated by a 240V high grade reduction geared motor designed to carry the heaviest of doors.

### Applications

Suitable for any applications including: Garages, Store Rooms, Factories, Shopfronts, Doorways and any situation where HIGH SECURITY is Vital.

## Specifications

Our High Torque Motor operate the door with ease eliminating the need for bulky industrial motors that take up so much room and unpleasant to the eye.

**Our Tamper Proof Covers and Welded Guide Tracks stop any thief from getting in and if they are in stop them from getting out**

Control is efficient and reliable, with power source tailored to door dimensions and structural requirements.

Operation is either through our standard radio wave remotes or if a physical item is required then opt for the wired key controls

Aluminum Bottom Rail designed to be the strength in the door to restrict deflection due to air pressure and intrude penetrations

Our Tamper Proof Shutter is versatile when the requirement for Aluminum to be used when strength is not a requirement

## Finish

Standard Galvanised Finish but for all of the colour fans we offer powder coating which will give you the ability to add some sophistication to your property.

Galvanised Folded Steel Guide Tracks, also can be Powder Coated

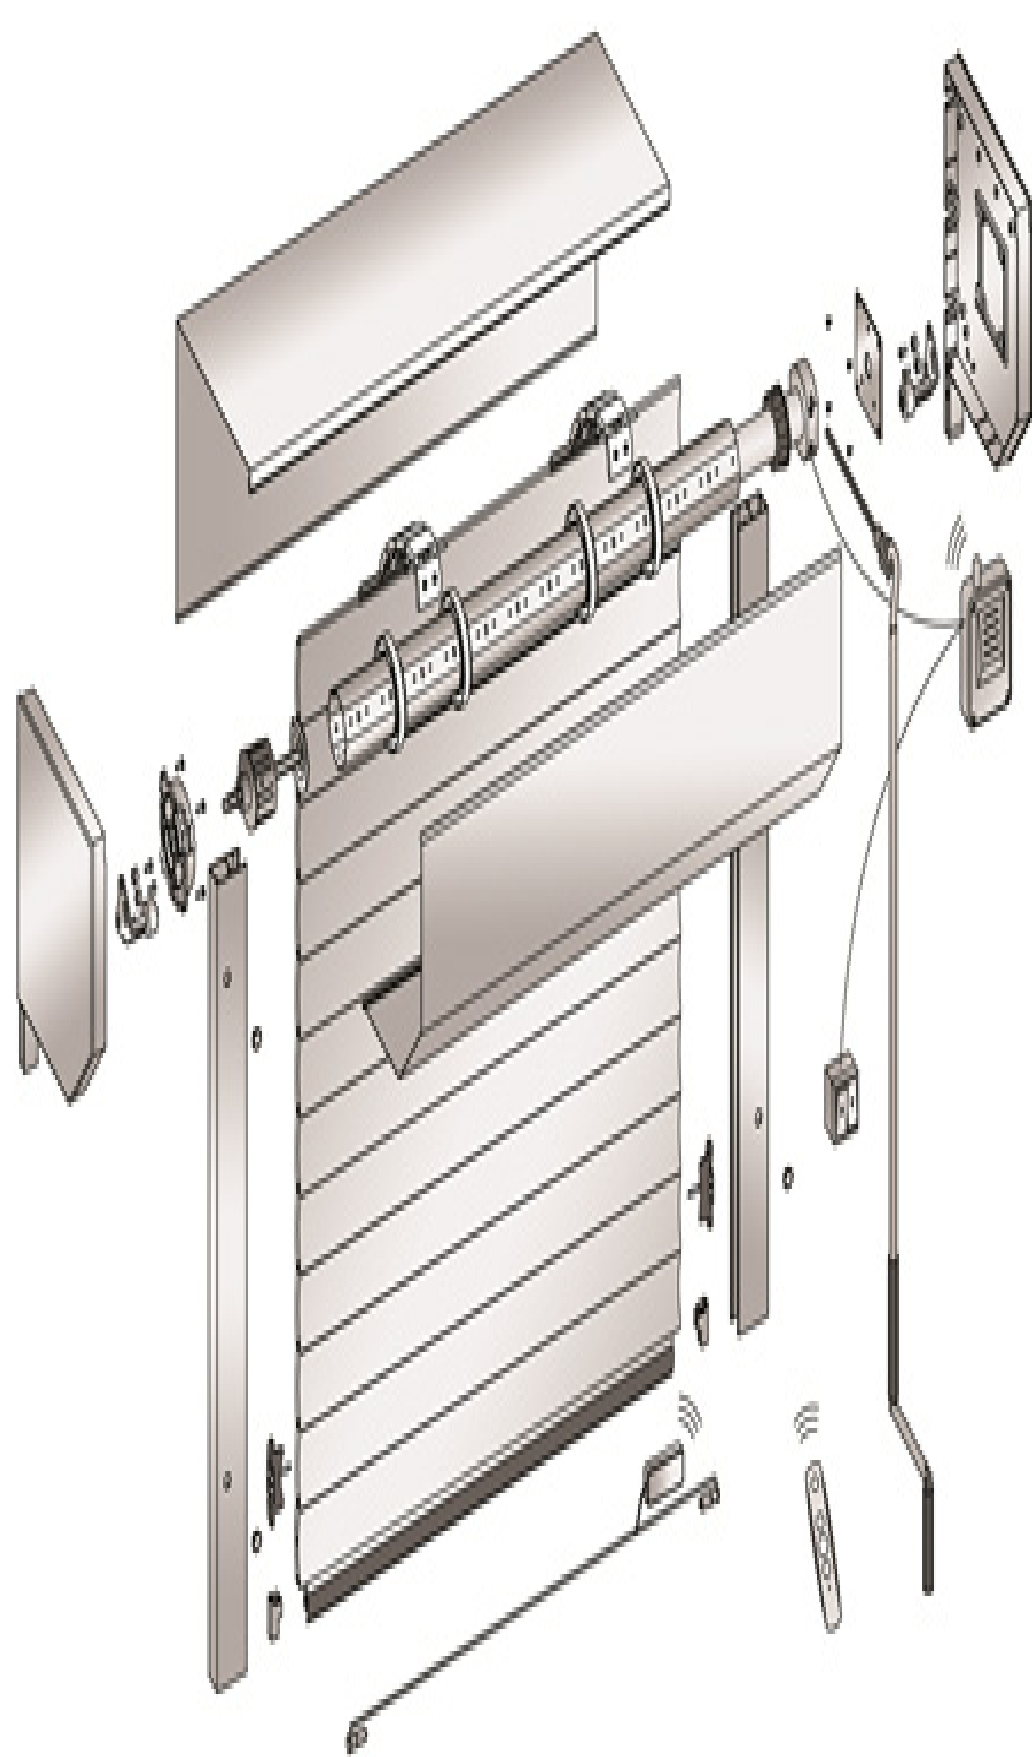

## Locking

The Motor, when the door is fully lowered locks the curtain into position restricting the ability to force the door. Just another reason why you should opt for the Tamper Proof.

## Operation

Motor Only
